

To the PCR moderator,

We find the PCR well written and very “fit-for-purpose”. However, we have a few suggestions on modifications:

- 6.1 The upstream processes include:
 - o [---]
 - o Production of ancillary materials
- 6.3 [---] The EPD shall however include information on recyclability, dismantling and handling of...
- 7.1.1 ~~Production of any Use of~~ ancillary materials
- 10.4 Word missing in first paragraph (“...is highly able.”)
